

GLOBAL WORKFORCE.
BUILT FOR HEALTHCARE.

Human-Led, AI-Supported Clinical & Administrative Services.

Physician-first. US-led. Built for practices that need capacity, not complexity.

kcclinicaladvisors.com

US-led. Physician-built. Operator-run.

Decades of experience in healthcare operations and clinical efficiency — driving outcomes for the practices we serve.

Clinical perspective

Physician leaders who have practiced medicine, managed patient panels, and felt documentation burden firsthand. Not a tech company bolting on advisors.

Business perspective

Decades of combined healthcare operations experience — reimbursement, margin management, EHR implementation, and workforce planning. We've lived the pressures you're facing.

Operator accountability

Weekly metrics. Embedded liaisons. Documented workflows. We operate the function — we don't just staff it and walk away.

FOUNDED 2024 • KANSAS CITY, MO HQ • BUENOS AIRES OPERATIONS HUB • 150+ FTES

Four integrated service lines covering the non-clinical workload.

PA was the ask. These four lines cover where else savings show up.

Prior Authorization & Benefits Verification

Faster approvals, fewer denials, and the appeals support to protect revenue.

PA specialists (imaging, surgery, medications, DME) • Surgical coordinators • Benefits & eligibility verification • Appeals & peer-to-peer coordination • Patient outreach for missing info

Medical Records, Admin & Call Center

Scheduling, call center, records, fax, and front-office coverage — inside your systems.

Medical records management & indexing • Fax management & routing • Inbound scheduling & call center • Outbound scheduling & recalls • Referral management • Front-office coverage

Nurse-Led Care Management

CCM, TCM, and preventive gap outreach — supporting ACO and value-based quality goals.

Chronic Care Management (CCM) RNs • Transitional Care Management (TCM) coordinators • Advanced Primary Care Management (APCM) • Preventive care gap outreach

AI-Supported Medical Scribing

Real-time documentation during the visit — so providers can focus on patients, not keyboards.

AI-supported live scribe (Teams) • Chart prep & pre-visit planning • Orders, diagnosis mapping, charge entry • Consistent assignment: same scribe per provider

All roles are fully employed by KCCA — not contracted, not subcontracted, not a marketplace.

We work inside your systems — like an onsite team, minus the onsite cost.

YOUR PRACTICE

Your systems
Your workflows
Your liaison

*Broad experience across
major EHR platforms*

Your EHR

We log into your EHR directly and work in it — no handoffs, no external platforms.

Your phones

We use soft-phones inside your scheduling system — calls appear as if from your front office.

Your workflows

We adapt to how your team already works — no system overhaul required.

Plus workflow optimization on request.

Your liaison

A single point of contact on your side. Weekly metrics review. Zero ambiguity.

No new platforms to buy. No workflows to rebuild. No consulting project to survive.

Faster than typical staffing timelines. Recruiting and onboarding in weeks 1–5, steady-state by week 8.

01 WEEKS 1–5

Recruit & onboard

Role specs, candidate sourcing, screening, and matching. Background checks, BAA, and HIPAA training.

02 WEEKS 5–8

Embedded training

EHR and platform training, workflow observation, and job shadowing alongside your team.

03 WEEK 8+

Steady state

Full coverage. Weekly performance reporting. Continuous refinement based on throughput and quality.

Complexity, whether role, specialty, or practice readiness, can extend any phase of this timeline.

OUTCOME: Fully embedded team delivering measurable output — without months of transition friction.

Security isn't a checkbox. It is how we operate.

Governance & certification

- HIPAA-compliant under BAA with every client
- Actively monitored by Compliance Group
- HITRUST e1 certification: targeting Fall 2026
- Annual third-party risk assessments
- Cyber liability insurance

Technical & access controls

- Role-based access — least-privilege by default
- Encrypted connections (TLS/VPN) to all systems
- No PHI stored on local devices
- Multi-factor authentication on all systems
- Managed, secure workstations in operations hub

Workforce & operations

- Full background checks on every team member
- HIPAA training at onboarding + annually
- Signed confidentiality & downstream BAAs
- Documented incident response & breach procedures
- Quarterly internal audits of access & workflows

Actively HIPAA-monitored by Compliance Group. *Security questionnaires and detailed compliance documentation available under NDA.*

GLOBAL WORKFORCE.
BUILT FOR HEALTHCARE.

LET'S TALK

Let's build a stronger healthcare workforce, together.

Your workflow, your pain points, and a clear next step, for your practice or PACN network-wide.
